The bamboo is a plant that grows in an upright position with varying stripes depending on the growth environment, making each cane unique. Instead of over-designing, this Bamboo Flagon uses its material and sculptural lines to depict the texture of natural beauty.

With a slanted, moon-shaped top opening, the sake wine poured from the top flows naturally into the bottle. One must take time pouring out the sake, as its small mouth serves as a reminder to slow down. Using a flagon to separate the sake from its original bottle helps preserve the quality of sake from changes in room temperature.
