

**Designer: YIWOOO**

This handmade bamboo coffee dripper has a double-wheel mouth design that looks like a spiral filter cup. The filter cup and the base can be separated to accommodate cups of different sizes. Recommended to use with large-sized filter paper.

The black-colored surface means it will not change color after extended usage. Additionally, the rattan fibers used at the opening is dyed naturally with black beans.

Dimensions: L10 x W10 x H12 cm
