Along the coast between Trapani and Marsala lies an evocative landscape of saline (shallow salt pools) and windmills. The salt from these marshes is considered Italy's finest and has been big business for centuries. The Saline Sculptural Vase is made by hand with the landscape of saline in mind.

The vase is made of stoneware clay added to firesand and mixed with porcelain clay. The result of this process is a unique texture. The piece has a matte surface, and is raw and unglazed. The stoneware fires on a slow burning curve at different temperatures to allow the natural color to come out. The vase is watertight and can be used for minimal floral arrangements or as a sculptural element.
