

**Designer: KADE CHAN**

The Jellyfish Origami Lampshade is a neat paper sculpture and a soft glow lampshade all rolled into one. It comes as an easy-to-assemble set of 13 pre-cut parts, all made of long-lasting paper, and with a comprehensive instruction manual. The edges are perforated for easy folding. You will need only glue for successful assembly, and, last but not least, patience and some spatial skills.

The lantern fits around a standard E14, E26, or E27 LED light bulb (600lm is recommended). The cord set and bulb are not included - this is a lampshade only.

Dimensions: L20 x W20 x H25 cm
