The name Kwords means one thousand words. The Kwords Cup depicts only one of thousands of Chinese characters, but also represents the astronomical significance the Chinese alphabet has on culture, society, and geography. This design sculpted in bone china is simple yet profound. It is a dedication to the medium of enlightenment and education. It is literature to be held in your hand, quite literally.

The four characters in this set represent fortune (*fu*), prosperity (*luk*), longevity (*shou*), double happiness (*xi*).
