

Designer: SCENE SHANG

An extraordinary table - XUAN revolves around the harmony of age-old traditions and contemporary purpose, centered on precious kinship and love, delighting with a hidden surprise.

Using precise geometric diagrams and rotational curves, the square table was divided into triangles first, inspired by an avant garde 1960s, three-sided mahjong table, chanced upon at a Singaporean Chinese gentlemen's club. Through several iterations, the perfect angles and shapes were created, and matched with a folding mechanism for the supporting legs - the result was a table that could transform from a slim console, to a triangular table, to a square one.

Addressing smaller urban homes of today - a slim console could be tucked away along a wall in urban homes, a triangular table could be tucked into a corner and the square table opened up when desired for meals, or games such as mahjong. The multiple forms can be chosen according to one's needs or fancy.

Transforming the table is a simple lifting or lowering of the triangular flaps, and shifting the supporting precision-made wood and brass legs below.

Dimensions: L90 x W90 x H76 cm

Primary Material: Wood

Primary Color: Brown

Customization: This product is not customizable.
