

**Designer: YIWAI**

This pair of soup ladle and colander spoon is made of stainless steel, with handles crafted from North American black walnut wood. The most interesting feature is the slotted holes on the colander spoon, which form a special pattern rather than circular holes that are traditionally placed equidistant. This piece is a subtle yet playful geometric iteration of an everyday object.

Dimensions: L24 x W4 cm

Primary Material: Stainless steel

Primary Color: Natural
